Dr. Keith A. Kvenvolden
Chief, Chemical Evolution Branch
National Aeronautics and Space Administration
Ames Research Center
Moffett Field, California 94035

Dear Dr. Kvenvolden,

Thank you for taking the time to write regarding your interest in a GC/HRMS facility to serve the Stanford University community. The number of positive responses Carl Djerassi and I received from our memorandum show that such a facility would serve many laboratories. Your positive response will help us in our planning for the proposed mass spectrometry service.

Sincerely yours,

Joshua Lederberg
Professor of Genetics
